A practical politician in Minnesota is quoted as saying that the Republican senti- unpardonable sin. ment of his State is at present decidedly for BLAINE, but that "circumstances," which time Washington despatches assert that the they would fight shy of such medicine. friends of the Administration are not as confident as they were, and that they are JERRY RUSK as a Presidential quantity are be uncomfortably out of the swim. said, meanwhile, to be assuming a more distinct form.

Altogether, now that the swing around form hurrabs have ceased to echo, there Gravesend track. seems to have been gathered on the trip nothing but new uncertainties. The intiossibility that President HARRISON might find on his tour how popular Mr. BLAINE is, developed into a real truth. The man from Maine has Republican hearts where the man in the White House has only politic consideration. It is this which causes the uneasiness at Washington and which lends strength to the apprehensions regarding new issues that will be, new candidates that may be and a new party that is.

WHAT OF THE TUNNEL?

Time has flown very swiftly since the passage of the bill providing for the lighting and ventilation of the Fourth Avenue Railway Tunnel. If its flight has been marked by any practical step towards the fulfilment of that law's purpose, the progress has not been reported. Yet the matter is one of great public importance and the questions involved are of such a horses race to be shut up in the grounds. nature that an early application towards their solution is demanded.

Upon the Railroad Commissioners rest the responsibility for carrying out the law, It is such a burden of duty as they should be pleased to discharge with the utmost possible promptness; and it is due to th interested public that the steps to that end should be taken in the sight of the people.

There is no spectacle which tones up the feelings more than an old age full of vigor and vivacity. Nobody would object to being ninety-four if he could feel and act and look like twenty-one. A beautiful example of long vity and conservation of force is presented in an old woman of eighty years, who was detected in somebody's house helping herself to alien goods. The head of the family, his wife, three daughters and a buxom Irish girl mounted guard over the old pilferer while a small boy scurried for the police. When the "copper arrived the guard of six were in a dread. arrived the guard of six were in a dread-fully disabled condition, all rumpled and Crawfordeville. For an hour the reptile lay motioneratched and torn, while the servant had locked herself up. The lusty old thiel had cleaned out the whole party. She was not ionest, nor was she venerable, but as an 1,400,000,000 old defender few can compare with her

The electric button is being applied all around. A man in Maine, that State where the charm of drinking liquor is enhanced by its being forbidden, has a groggery with an expert in the window who presses an electric button to discriminate between the "shady" and "straight" customers. There is always a pleasure in seeing the field of employment enlarged. A Connecticut man has a button connection with his chicken house as well as a burglar alarm. If a chicken thief invades the home of the fowl the owner is awakened. His presses the button and the chickens get a charge which sets them a-crowing. The thief usually does not wait to investigate. Electricity is a great and beautiful thing.

There is no reason why a burglar may not have some fine feeling in him, although burgling is not of itself likely to bring out the best in a man. A fellow who was caught breaking into a house has written a letter to his wife full of contrition for having wedded her when he was so unworthy. He prays for her forgiveness and admits her lovely qualities with tearful carnestness. He gave a false name to screen her from the disgrace of his conviction. Perhaps if this burglar had possessed an income he might have been a good man as well as a loving hus-

The best move

you can make, no matter what you have to wash or clean, is to try Pearline. Don't try to get along without it. Housework will be harder, and it won't be so well done. The weekly wash will be a burden. Pearline lightens your labors. It cleans everything and injures nothing. Use it without soap and double the economy.
